

DCP3 Series Acknowledgments

Disease Control Priorities, third edition (*DCP3*) compiles the global health knowledge of institutions and experts from around the world, a task that required the efforts of over 500 individuals, including volume editors, chapter authors, peer reviewers, advisory committee members, and research and staff assistants. For each of these contributions we convey our acknowledgment and appreciation. First and foremost, we would like to thank our 32 volume editors who provided the intellectual vision for their volumes based on years of professional work in their respective fields, and then dedicated long hours to reviewing each chapter, providing leadership and guidance to authors, and framing and writing the summary chapters. We also thank our chapter authors who collectively volunteered their time and expertise to writing over 170 comprehensive, evidence-based chapters.

We owe immense gratitude to the institutional sponsor of this effort: The Bill & Melinda Gates Foundation. The Foundation provided sole financial support of the Disease Control Priorities Network (DCPN). Many thanks to Program Officers Kathy Cahill, Philip Setel, Carol Medlin, Damian Walker and (currently) David Wilson for their thoughtful interactions, guidance, and encouragement over the life of the project. We also wish to thank Jaime Sepúlveda for his longstanding support, including chairing the Advisory Committee for the second edition and, more recently, demonstrating his vision for *DCP3* while he was a special advisor to the Gates Foundation. We are also grateful to the University of Washington's Department of Global Health and successive chairs King Holmes and Judy Wasserheit for providing a home base for the *DCP3* Secretariat, which included intellectual collaboration, logistical coordination, and administrative support.

We thank the many contractors and consultants who provided support to specific volumes in the form of economic analytical work, volume coordination, chapter drafting, and meeting organization: the Center for Disease Dynamics, Economics & Policy; Center for Chronic Disease Control; Centre for Global Health Research; Emory University; Evidence to Policy Initiative; Public Health Foundation of India; QURE Healthcare; University of California, San Francisco; University of Waterloo; University of Queensland; and the World Health Organization.

We are tremendously grateful for the wisdom and guidance provided by our advisory committee to the editors. Steered by Chair Anne Mills, the advisory committee ensures quality and intellectual rigor of the highest order for *DCP3*.

The National Academies of Sciences, Engineering, and Medicine, in collaboration with the Interacademy Medical Panel, coordinated the peer-review process for all *DCP3* chapters. Patrick Kelley, Gillian Buckley, Megan Ginivan, Rachel Pittluck, and Tara Mainero managed this effort and provided critical and substantive input.

World Bank Publishing provided exceptional guidance and support throughout the demanding production and design process. We would particularly like to thank Carlos Rossel, Mary Fisk, Nancy Lammers, Rumi Pancholi, Deborah Naylor, and Sherrie Brown for their diligence and expertise. Additionally, we thank Jose de Buerba, Mario Trubiano, Yulia Ivanova, and Chiamaka Osuagwu of the World Bank for providing professional counsel on communications and marketing strategies.

Several U.S. and international institutions contributed to the organization and execution of meetings that supported the preparation and dissemination of *DCP3*.

We would like to express our appreciation to the following institutions:

- University of Bergen, consultation on equity (June 2011)
- University of California, San Francisco, surgery volume consultations (April 2012, October 2013, February 2014)
- Institute of Medicine, first meeting of the Advisory Committee to the Editors (March 2013)
- Harvard Global Health Institute, consultation on policy measures to reduce incidence of noncommunicable diseases (July 2013)
- National Academy of Medicine, systems strengthening meeting (September 2013)
- Center for Disease Dynamics, Economics & Policy (Quality and Uptake meeting, September 2013; reproductive and maternal health volume consultation, November 2013)
- National Cancer Institute, cancer consultation (November 2013)
- Union for International Cancer Control, cancer consultation (November 2013, December 2014)
- Harvard T. H. Chan School of Public Health, economic evaluation consultation (September 2015)
- University of California, Berkeley School of Public Health, and Stanford Medical School, occupational and environmental health consultations (December 2015).

Carol Levin provided outstanding governance for cost and cost-effectiveness analysis. Stéphane Verguet added valuable guidance in applying and improving the extended cost-effectiveness analysis method. Elizabeth Brouwer, Kristen Danforth, Nazila Dabestani, Shane Murphy, Zachary Olson, Jinyuan Qi, and David Watkins provided exceptional research assistance and analytic assistance. Brianne Adderley ably managed the budget and project processes, while Jennifer Nguyen, Shamelle Richards, and Jennifer Grasso contributed exceptional project coordination support. The efforts of these individuals were absolutely critical to producing this series, and we are thankful for their commitment.

Volume and Series Editors

VOLUME EDITORS

Charles N. Mock

Charles N. Mock, MD, PhD, FACS, has training as both a trauma surgeon and an epidemiologist. He worked as a surgeon in Ghana for four years, including at a rural hospital (Berekum) and at the Kwame Nkrumah University of Science and Technology (Kumasi). In 2005–07, he served as Director of the University of Washington's Harborview Injury Prevention and Research Center. In 2007–10, he worked at the World Health Organization (WHO) headquarters in Geneva, where he was responsible for developing the WHO's trauma care activities. In 2010, he returned to his position as Professor of Surgery (with joint appointments as Professor of Epidemiology and Professor of Global Health) at the University of Washington. His main interests include the spectrum of injury control, especially as it pertains to low- and middle-income countries: surveillance, injury prevention, prehospital care, and hospital-based trauma care. He was President (2013–15) of the International Association for Trauma Surgery and Intensive Care.

Olive Kobusingye

Olive Kobusingye is an accident and emergency surgeon and injury epidemiologist. She is on faculty at Makerere University School of Public Health where she heads the Trauma, Injury, and Disability (TRIAD) Project and coordinates graduate training in those disciplines. Before Makerere, Olive was the Regional Advisor on Violence, Injuries, and Disabilities at the World Health Organization's regional office for Africa (AFRO). She is the founding Executive Director of the Injury Control Center–Uganda, and founding Secretary General of the Injury Prevention Initiative for Africa. She established

the first hospital trauma registries in Sub-Saharan Africa and codeveloped the Kampala Trauma Score, now used in many low-income countries. Her research interests include injury surveillance, injury severity measurement, emergency trauma care systems, road safety, and drowning.

Rachel Nugent

Rachel Nugent is Vice President for Global Noncommunicable Diseases at RTI International. She was formerly a Research Associate Professor and Principal Investigator of the DCPN in the Department of Global Health at the University of Washington. Previously, she served as Deputy Director of Global Health at the Center for Global Development, Director of Health and Economics at the Population Reference Bureau, Program Director of Health and Economics Programs at the Fogarty International Center of the National Institutes of Health, and senior economist at the Food and Agriculture Organization of the United Nations. From 1991–97, she was associate professor and department chair in economics at Pacific Lutheran University.

Kirk R. Smith

Kirk R. Smith is Professor of Global Environmental Health at University of California, Berkeley School of Public Health. He is also founder and coordinator of the campus-wide Masters Program in Global Health and Environment. Previously, he was founder and head of the Energy Program of the East-West Center in Honolulu. He serves on a number of national and international scientific advisory committees, including the Global Energy Assessment, National Research Council's Board

on Atmospheric Sciences and Climate, the Executive Committee for WHO Air Quality Guidelines, the Intergovernmental Panel on Climate Change, and the Global Burden of Disease. He is a member of the U.S. National Academy of Sciences and holder of the Tyler and Heinz Prizes for environmental achievement.

SERIES EDITORS

Dean T. Jamison

Dean T. Jamison is Emeritus Professor in Global Health Sciences at the University of California, San Francisco, and the University of Washington. He previously held academic appointments at Harvard University and the University of California, Los Angeles. Prior to his academic career, he was an economist on the staff of the World Bank, where he was lead author of the World Bank's *World Development Report 1993: Investing in Health*. He serves as lead editor for *DCP3* and was lead editor for the previous two editions. He holds a PhD in economics from Harvard University and is an elected member of the Institute of Medicine of the U.S. National Academy of Sciences. He recently served as Co-Chair and Study Director of *The Lancet's* Commission on Investing in Health.

Rachel Nugent

See the list of Volume Editors.

Hellen Gelband

Hellen Gelband is an independent global health policy expert. Her work spans infectious disease, particularly malaria and antibiotic resistance, and noncommunicable disease policy, mainly in low- and middle-income countries. She has conducted policy studies at Resources for the Future, the Center for Disease Dynamics, Economics & Policy, the (former) Congressional Office of Technology Assessment, the Institute of Medicine of the U.S. National Academies, and a number of international organizations.

Susan Horton

Susan Horton is Professor at the University of Waterloo and holds the Centre for International Governance

Innovation (CIGI) Chair in Global Health Economics in the Balsillie School of International Affairs there. She has consulted for the World Bank, the Asian Development Bank, several United Nations agencies, and the International Development Research Centre, among others, in work conducted in over 20 low- and middle-income countries. She led the work on nutrition for the Copenhagen Consensus in 2008, when micronutrients were ranked as the top development priority. She has served as associate provost of graduate studies at the University of Waterloo, vice-president academic at Wilfrid Laurier University in Waterloo, and interim dean at the University of Toronto at Scarborough.

Prabhat Jha

Prabhat Jha is the founding director of the Centre for Global Health Research at St. Michael's Hospital and holds Endowed and Canada Research Chairs in Global Health in the Dalla Lana School of Public Health at the University of Toronto. He is lead investigator of the Million Death Study in India, which quantifies the causes of death and key risk factors in over two million homes over a 14-year period. He is also Scientific Director of the Statistical Alliance for Vital Events, which aims to expand reliable measurement of causes of death worldwide. His research includes the epidemiology and economics of tobacco control worldwide.

Ramanan Laxminarayan

Ramanan Laxminarayan is Director of the Center for Disease Dynamics, Economics & Policy in Washington, DC. His research deals with the integration of epidemiological models of infectious diseases and drug resistance into the economic analysis of public health problems. He was one of the key architects of the Affordable Medicines Facility—malaria, a novel financing mechanism to improve access and delay resistance to antimalarial drugs. In 2012, he created the Immunization Technical Support Unit in India, which has been credited with improving immunization coverage in the country. He teaches at Princeton University.

Policy Forum Participants

The following individuals provided valuable insights to improve this volume's key findings through participation in the Disease Control Priorities—World Health Organization, Regional Office for the Eastern Mediterranean policy forum on Road Traffic Injury Prevention and Trauma Care. The forum was held in Sharjah, the United Arab Emirates, on February 22, 2016, and was organized by Dr. Ala Alwan, Regional Director Emeritus and member of the DCP3 Advisory Committee to the Editors.

Bahar Idris Abu Garda

Federal Minister of Health, Khartoum, Sudan

Faisal Al-Anaizi

Director of Injury Prevention Programme, Ministry of Health, Riyadh, Saudi Arabia

Mohamed Saad AlKharji

Head of Traffic Department, Ministry of Interior, Doha, Qatar

Wahid Al-Kharusi

Ambassador Emeritus, Muscat, Oman

Reda'a Al Menshawy

Minister of Health, El-Beida, Libya

Yasser Al Naimi

Consultant, Hospital Sector, Ministry of Health, Abu Dhabi, United Arab Emirates

Omran bin Mohammad Al Omran

Director General of Road Services Department, Ministry of Transport, Riyadh, Saudi Arabia

Hussain Abdul Rahman Al-Rand

Assistant Undersecretary, Health Centers and Clinics, Ministry of Health, Abu Dhabi, United Arab Emirates

Mohamed Awadh Alrawas

Director General of Traffic Affairs, Royal Oman Police, Muscat, Oman

Ala Alwan

Regional Director Emeritus, World Health Organization, Regional Office for the Eastern Mediterranean, Cairo, Arab Republic of Egypt

Raed Arafat

Deputy Health Minister, Ministry of Health, Bucharest, Romania

Osama Bahar

Major, Directorate of Traffic Services, Ministry of Interior, Manama, Bahrain

Nasir Baoum

Minister of Public Health and Population, Sana'a, Republic of Yemen

Gayle DiPietro

Global Road Safety Program Manager, The International Federation of Red Cross and Red Crescent Societies, Geneva, Switzerland

Ahmed ElAnsary

Head of Ambulance and Emergency Medical Services, Ministry of Health and Population, Cairo, Arab Republic of Egypt

Gururaj Gopalakrishna

Professor and Head, Department of Epidemiology, World Health Organization Collaborating Centre for Injury Prevention and Safety Promotion, Centre for Public Health, National Institute of Mental Health and Neurosciences (NIMHANS), Bangalore, India

Mohammad Jalili

Associate Professor of Emergency Medicine and Vice Chancellor of Education, Tehran University of Medical Science, Tehran, Islamic Republic of Iran

Junaid Razzak

Director, Telemedicine Program, and Senior Advisor for Global Health, Department of Emergency

Medicine, Johns Hopkins University School of Medicine, Baltimore, Maryland, United States; Joint Appointment, Department of International Health, Johns Hopkins Bloomberg School of Public Health; Visiting Faculty, Department of Emergency Medicine, Aga Khan University, Karachi, Pakistan

Ramzi Salamé

Executive Director, Interministerial National Road Safety Council, Beirut, Lebanon

Essam Sharaf

Former Prime Minister and Minister of Transport; Professor of Road Engineering, Cairo University, Cairo, Arab Republic of Egypt
